MTB Varied circuit with an interesting profile

The steepest part of the tour is right at the outset, but after a few minutes you leave the village and reach the entrance of Bosco Arte Stenico. This is a truly unique open-air presentation of works of art and sculptures made of wood. It's definitely worth including a little time to look at them. You should push your bike through the park (or at least ride very considerably) out of respect for the artists and other visitors. The rest of the tour is a constant series of ups and downs across regularly changing surfaces and an alternating sequence of meadows, woods and farmland. Now and again you pass through picturesque villages. After 18 km you return to the starting point in Stenico.
