1910 VAL DI GRESTA TRAIL-TOUR

Design and cartography 2024 | max2.at

MTB A panoramic tour that encompasses the entire Val di Gresta.

The route starts in Ronzo-Chienis and initially climbs towards Passo Santa Barbara, a pass at 1169 m leading into the Valle del Sarca. Here, there's also the chance to join one of the MTB trails coming up from Arco. A long descent follows, first on beautiful trails through the woods, then on narrow secondary roads down to Valle San Felice, the lowest point of the tour at 550 m. Passing through the villages of Manzano and Nomesino, the route almost entirely circles the ridge of Monte Biaena on paved roads, reaching Passo Bordala after about 21 km and an additional 800 meters of elevation gain. From there, you relaxingly descend on forest roads and trails towards Passo Santa Barbara, before heading back to the starting point along the same route.
