743 BOCCA DI TOVO TRAIL-TOUR

Design and cartography 2024 | max2.at

MTB

An MTB classic with four different variants.

You can undertake this tour in its original version or in one of four variants, some shorter and some longer, depending on your ability and mood. Start from Arco, taking gravel paths to reach the road towards San Giovanni al Monte, which you follow until you arrive at the summit of Doss del Clef with its unconventional summit cross. There, a forest path branches off and leads to the eponymous Bocca di Tovo, just below 1100 m. A rapid trail descent takes you down steep terrain to Malga Tovo and on to Croce di Bondiga, a vantage point with sensational views out over Lake Garda. The route then undulates and alternates between gravel and tarmac, after which a longer descent takes you down to Lago di Tenno. The turquoise lake invites you to pause before cycling through Tenno and Varignano, back to your starting point.
