746 PASSO DELLA MORTE TRAIL-TOUR

Design and cartography 2024 | max2.at

MTB Not as dangerous as its name, but long and demanding all the same.

Taking on this tour means climbing over 2000 metres and covering almost 60 kilometres. A winding road leads up to San Giovanni al Monte, a little village with a splendid view at the pass over to Val Lomasona. There you switch to gravel and continue uphill on forest tracks and easy trails until you reach the top of the tour: Monte Casale. The unique view at the summit ranges from Lake Garda to the Sella Group. You should definitely include a longer break there. After descending via the gravelled road to Comano, climb again to Passo della Morte. The descent from the pass starts on forest tracks but gets narrower and steeper towards the bottom, so you need to be able to handle your bike. After reaching the village of Sarche, cycle along attractive level paths until you arrive back in Arco.
