## MTB Fascinating lake circuit with an interesting variant

Start by passing through Pieve, then ride up to Locca at the entrance of the Val Concei. Proceed through dense forest along the steep slopes on the northern shore of Lake Ledro, enjoying frequent views right down to the lake. After 6.7 kilometres, you have the option of extending what is not a particularly long tour to include a rewarding diversion up to Malga Dromaé – or you can ride straight down to Mezzolago. You then ride around the lake and there are places where you can stop for a dip. Mostly you're on tarmac, but there's one interesting section through natural woodland on the south shore, after Pur. If you like culture, you should definitely include a stop at Museo delle Palafitte in Molina.
