

MTB Sensational trail circuit in the upper Valle di Ledro – not for beginners

Start at Tiarno di Sotto on minor roads that take you up to the beautifully situated Chiesetta S. Giorgio, then continue to climb constantly to the Bocca di Giumella pass which gives the route its name. Things then change to gravel and after Malga di Cap you reach a trail that promises the ultimate in spectacular riding. Rushing over changing gradients and surfaces, along a path of very varied width, you pass through the woods towards Passo di Giovo. Then begins a steeper section that's difficult to negotiate due to very loose stones. This then turns into a forestry track that descends to Tirano die Sopra. Finally, return along the cycle path to the starting point at Tiarno di Sotto.
